STATE DEPARTMENT
GETS IMPATIENT

Foreign Minister Aguilera's Statement Considered to Have Been Home Reading

WACON, July 1.—Mexican troops are massed on the border of the state of Chiapas, and the gunboat Salem, at Tuxtla, is in the harbor. The American Legation has been established and has been in contact with the Mexican government, and it is highly desirable that every citizen of the United States be brought out.

PASO, July 1.—Carranzista troops in the southern portion of Chiapas are being moved nearer, and contracted American lines, according to information received here.

General Jacinto Trevino, commander of the de facto government's northern army, is in the General Carranza's base, at Colonia Dublan, and his reinforcements continue to arrive at Villa Almada.

No movement is believed by military officers here to be the forerunner of an attack on the American Legation.

General Carranza should be the first to be informed of the two governments' attack on the border.

MESSAGE CONTRADICTED.

WASHINGTON, July 1.—Contrary to reports in certain diplomatic quarters, the General Carranza's American friends here today indicated that the first chief will not adopt a definite line in answering the United States' demands. He will, instead, add a "final note," surprising when he considers the presence of American troops in Mexico as an infringement on Mexican sovereignty. The United Press informant, whose information heretofore has been correct, indicated that the Carranza army would be such as to fall on a bridge between the two governments. In some quarters today, it is suggested that a note may open the way to a major move.

MINISTER AGUILERA'S statement, "I am being informed in Mexico that the Carranza government had no word of an official note," gave vast consolation.

REPLY UNKNOWN.

His late state department said its reply was still in Carranza's office. It did not demand withdrawal of the American expedition, but it suggested that forces had to stay to the last.

The statement of course Carranza's forces now intend to march toward the boundary, is regarded as a definite demand.

SECRETARY OF STATE, however, would not say to Mexico, "You are to withdraw." Arrangements were to be made to withdraw.

Other government officials in the United States said they had no desire to force Carranza to answer.

The fact that European diplomats are doing well as United States friends of the present government, and in their power, is the first line of defense. Officers to the right and left of the line, and his men, would force him to adopt an answer.

WORKS CAPTURED.

After a brief respite, marked only by intense cannonading, the Germans directed a most powerful thrust against the French lines east of hill 304. It was in this fighting that the enemy captured the French fortified work which was later taken. Early this morning the Germans launched the fourth attack against the Avoine redoubt. This attack was speedily stopped by French fire.

East of the Meuse the battle had raged unceasingly for two days, attempting to carry French positions west of the Esnes-Hautcourt highway. This attack also was repulsed.

AGUILAR'S REPLY BACKED BY PRESS

Mystery Veils Explosion On S.P. Train; 13 Injured

(Continued From Page 1)

Newspapers Vigorously Approve of Statement by Foreign Secretary.

MEXICO CITY, July 1.—The Mexican City newspapers today vigorously approved the statement given out yesterday by Foreign Secretary Aguilar, commenting on and refuting assertions in the American note.

The foreign office statement was published in the same editions with the American note, which was thus given to the public for the first time. The newspapers printed first a paragraph of President Wilson's communication and then inserted a paragraph of Secretary Aguilar's reply asserting that particular charge.

JUSTIFIED, PRESS ASSERT.

Officials said today that the tone of Aguilar's statement was fully justified, because of the tone of the American note. They complained that the United States has sent several extremely sharp and diplomatic messages to the Mexican government, and said that they had withheld publication of many of these communications because they did not want to stir up hostility to the United States.

The foreign office announced today that immediately upon receipt of information that Secretary Lansing had issued fresh warning for Americans to leave Mexico, instructions were telegraphed to all civil and military authorities to give guarantees of protection to all Americans and other foreigners within their jurisdiction.

TREVINO REPORTS.

The war office has received from General Trevino a complete official report of the encounter at Carrizal, confirming the statement of the Mormon guide, Lem Spillsbury, that the Americans were the aggressors.

This version of the Carrizal clash not only supports the previous Mexican official narrative of that encounter, but gives the new allegation that Captain Boyd of the American detachment, defiantly declared he "would march to Villa Ahumada in the face of fire." It was an official report of Lieutenant-Colonel Rivas made to General Trevino.

Old Sweethearts Meet and Marry

MARYVILLE, July 1.—Sweethearts of 10 years ago were reunited here when Willis Bialsted, a well-known resident of Salt Lake, was married to Mrs. Marie Arlen, a wealthy widow of Seattle.

The two were sweethearts in Little country town in Illinois in their boyhood and girlhood days. Finally Bialsted went out in the world to earn his living. He was married, reared a family and his wife died. His youthful sweetheart was also married and became a widow. Years went by without their hearing of each other.

Finally they met on a Western Pacific train coming to California. Neither recognized the other, but they talked casually together as train acquaintances. They soon discovered their early acquaintanceship, and the love of their early days was rekindled. They left the train at Oakland yesterday, secured a marriage license, and were married by Justice Parker.

Farmer Pulls Gun Under Fence; Dies

WOODLAND, July 1.—Albert Mast, a rancher living two miles this side of Madison, was accidentally shot to death when attempting to crawl through a wire fence.

Mast went out before breakfast to shoot crows, which have been doing damage to crops. The ranch is owned by his mother, Mrs. C. E. Mast, and the victim and his brother, Christian, leased it to him. Mast, yesterday, secured a hunting license, and was married by Justice Parker.

FIRST TO ARRIVE.

Inspector Charles McCarthy was one of the first on the scene.

He lives within a few blocks of the Sixteenth-street station and the explosion shook his house. He rushed to

the scene and, with Inspector Joseph Robinson, assisted in rescuing passengers.

McCarthy made a careful inspection of the car within fifteen or twenty minutes after the explosion. His description of the damage is contained in a detailed report to Captain Agnew.

"The car is a steel day coach and was the smoker on this train," said McCarthy. "I made a careful survey of it as soon as the injured persons had been removed to a place of safety."

"The force of the explosion seems to have been exerted in all directions from the lavatory at the front end of the coach as the center of force. The partition between the lavatory and the rest of the car was blown completely out and the seats on both sides of the car for a distance of five or six seats from this partition were wrenched from the floor and those nearer the lavatory were badly smashed.

"Every window in the car on both sides was shattered, there being twenty windows in all.

"A freakish element in the explosion was apparent. Although the steel sides of this strong coach were bulged out on both sides, a hole blown in the roof, and every window shattered, the glass in the door of the lavatory was unbroken. This door was torn from its frame and hurled several feet down the aisle, but the glass remained unbroken, despite the fact that the adjoining partition was broken into splinters. The little box of the train butcher, across the car from the lavatory, was also unbroken.

"On the side of the car in which the lavatory stood, and the center of the explosion, the side of this steel car was bulged out at the front end eleven or twelve inches. On the opposite side the steel was bulged four or five inches at the front end.

"Directed over the lavatory and the center of the car a hole four by six feet was blown completely out, leaving a ragged hole in the metal, with the metal bent upward, thus combining with other evidence to indicate that the explosion was from within the car and almost surely from within the lavatory.

FLOOR UNINJURED.

"The floor of the car, even in the lavatory, was apparently undamaged. The cross-beams underneath were not bent, although one was wrenched sideways.

"I examined the gas tank and the compressed air tank. They are underneath the floor of the car on the same side as the lavatory, but well toward the middle of the car. Neither showed any signs of damage and the floor above them was untouched. Their pipes were in good condition.

"The gauge on the gas tank registered zero. I think that this may have been caused by the fact that the pipe leading up into the lavatory for the light was broken by the explosion and allowed the gas to escape."

That the explosion was in all probability an accident and not the result of any plan to destroy property or to take lives, is the theory advanced by Chief of Police W. J. Petersen as the most likely explanation of the facts which have so far been ascertained by the police.

"A burglar or safe-cracker, or a pair of yeggs, may have had some nitro-glycerine," said Chief Petersen. "Fearing being caught with the explosive, or not wishing to undergo the risk of carrying it further when at any moment a slight jar might have set it off, the man may have abandoned it in the lavatory on the train. This is a possibility, and some of the somewhat freakish elements in the manner of the explosion indicate it."

"There seems little doubt that it was a high explosive. Black powder

would not have produced these results. It was apparently dynamite, nitro, or some mixture that was highly explosive.

"If there had been a design to destroy property, the explosive could have been used much more effectively. The lavatory of the smoking car was perhaps the poorest place to leave it. There are few facts in this affair which would seem to indicate that the explosion was planned and carried out with a purpose in view. Additional information may disclose that there was intent and that a plot had been laid. But the present indications would seem, from the first cursory examination, to suggest that this explosion was an accident.

POSSIBILITIES.

"A jarring of the train could set off one of these high explosive mixtures. Had it been placed on the rack in the lavatory, or over the flush tank, or in some package hung on a hook, it might have exploded by falling or bumping when the train came to a stop. It would seem that it was not on the floor of the car, as little damage was done there. High explosive generates force in every direction, and there would have been some damage to the floor had the explosion originated in contact with the floor of the car.

"It might have been a mining man who left some high explosive in the car. There is also the possibility that it was an infernal machine. Whatever it was, there is nothing so far in the hands of the police to indicate a purpose in setting it off at that time and place."

When Mast was called for breakfast there was no response. Christian went to seek his brother and found his dead body lying partly through the fence with a bullet hole through the head. Evidently death had been instant.

Deceased was 36 years old and unmarried. Besides his mother and brother at Madison, he leaves a brother, Henry, in Los Angeles, a sister, Pauline, who is an instructor in a San Francisco business college, and an aunt, Mrs. Gotthe Mast of Woodland.

Deputy Coroner Oliver went to Madison to hold an inquest.

Training School For Glenn County

ORLAND, July 1.—Plans have been submitted to the board of Trustees of the Orland high school for a manual training and gymnasium building, the erection of which is intended to begin with the opening of the next school year.

The excavation work will be done by hired help, but the manual training class, under the direction of Prof. H. J. Husse, will draw the details of every part of the plans, and handle all the work from the foundation walls to the interior finishing.

The building will be about 42 by 90 feet and two stories in height, built of reinforced concrete, to match in general style of architecture the Orland high school building, and will stand upon a corner of the same grounds. The lower floor will contain iron and wood working rooms, recitation room, dry kiln, etc., and a broad central hall. The upper story will be finished off as a gymnasium.

Marysville Voters Endorse School Tax

MARYSVILLE, July 1.—By a vote of 561 ayes to 183 nays the taxpayers of Marysville at the special school election yesterday voted record as favoring a new tax of \$1,000,000 for the construction of an additional grammar school building on the lot at the northwest corner of F and Seventh streets.

The levy will be part of the budget which the supervisors will create next September. It is estimated the tax will be an extra 75 cents on each \$100 of valuation with the new school.

The school building has become a necessity on account of the steady increase in the population of Marysville since the construction of two new buildings for school purposes seven years ago, at which time \$80,000 was voted at a bond election.

Falls 3 Floors, But Is Not Badly Hurt

LOS ANGELES, July 1.—The fact that he was "hard headed" yesterday probably saved the life of Ralph Wright, an employee of the Pacific Light and Power Co. Wright was at work on the roof of the plant of the Los Angeles Ladder Company at Second and San Pedro streets, Los Angeles, and fell to the ground three floors below. He

was only slightly hurt.

CLARKE PLAYS GUILTY TO

Admits Truth of
Daughter of
Church

BERKELEY, July 1.—President Wilson has taken his Mexican policy for a campaign issue and put it up to his political adversaries.

This is the opinion of political and official Washington today, following the President's return from New York, where he spoke last night.

Taking the issue which his Republican opponents had threatened to make the principal object of attack, the President has adopted it as his own.

The question he raised last night in his speech before the New York Press Club were believed directed primarily at those contesting his re-election. The questions were:

"Would the glory of America be enhanced by war of conquest in Mexico?" "Would an act of violence by a powerful nation like this against a weak and distracted neighbor reflect distinction upon the annals of the United States?"

"Is it our duty to carry self-defense to the point of dictation in the affairs of another people?"

WAR LAST RESORT.

From this and other utterances along the same line, the President is said by his friends today to have indicated clearly he will not countenance war between the United States and Mexico save as an unavoidable resort in settling border troubles.

For the second time in as many days, he said he would stake his personal fortunes upon the ideal he is following in Mexico.

For the first time the President indicated what may be in his mind as to the immediate purpose of concentrating such large armed forces on the border.

"Force," he said, "can sometimes hold things steady until opinion has had time to form. No force ever exerted except in response to that opinion was ever a conqueror and predominating force."

WITHOUT PREPARATION.

In his address President Wilson said: "I realize that I have done a very imprudent thing. I have come to advise the country to go to war, company of men without any preparation, and if I could have written as witty a speech as Mr. Pulitzer I would have written it. If I could have written as clear an explanation of the fundamental ideas of American patriotism as the mayor I should have attempted it. I could have been as appealing a person as is possible at heart as Mr. Cobb. I could have been as generous and interesting and genial as Mr. Colby. I should have felt that I could let myself go without any preparation."

But, gentlemen, is a matter of fact I have been absorbed by the responsibilities which have been frequenting my thoughts, and that preoccupation has made it impossible for me to forget even what you would like to hear me talk about.

There is something very oddly contradictory about what you may have on me. You are sometimes, particularly in your photographic enterprises, why, bring it to me, and you sometimes, indeed, apply it, even to the extent of imitating it, to documents before they are formed, and yet I am tempted then I stand face to face with you to take off all guard and merely exclaim, "Look at the infallible human being that I am."

Mr. Colby and something that was among the few things that had forecast to say me. He said that there are some things which are really useless to do, because they go as a matter of course.

DOING PREPARE.

Of course, it is our duty to prepare this nation to take care of its honor.

DANIELS APPROVES NAVY AMENDMENT

Revised Program, Including
General Board's Plan
Satisfactory.

WASHINGTON, July 1.—Formal approval of the increased navy building program recommended by the Senate naval committee in amending the annual appropriations bill passed by the House was given in statement issued today by Secretary Daniels. The committee, besides framing a program calling for four dreadnaughts and two battle cruisers next year, wrote into the bill a provision for completing within three years the general board's plan to add sixteen capital ships before 1922.

The easiest thing is to strike. The man has to be the impulsive thing. He is the one who takes aggressive action, but often it really conserves the honor by realizing the ideals of the nation he has to be the one who does it.

Do you think the glory of America will be enhanced by a war of conquest in Mexico? Do you think that any act of violence by a powerful nation like this against a weak and distracted neighbor reflect distinction upon the annals of the United States?

Do you think that it is our duty to carry self-defense to a point of dictation into the affairs of another people? Do you think that the ambitions of America are not co-incident with the ambitions of the nation itself?

LETTERS OF "ADVICE."

I want you to know fully I realize you are a servant I am. I do not own the United States, even in the use of it to expand our own ambitions. I have no right to expand our ambitions if the development of America is not co-incident with the ambitions of the nation itself.

Do you think that it is our duty to carry self-defense to a point of dictation into the affairs of another people? Do you think that the ambitions of America are not co-incident with the ambitions of the nation itself?

Do you think that it is our duty to carry self-defense to a point of dictation into the affairs of another people? Do you think that the ambitions of America are not co-incident with the ambitions of the nation itself?

Do you think that it is our duty to carry self-defense to a point of dictation into the affairs of another people? Do you think that the ambitions of America are not co-incident with the ambitions of the nation itself?

Do you think that it is our duty to carry self-defense to a point of dictation into the affairs of another people? Do you think that the ambitions of America are not co-incident with the ambitions of the nation itself?

Do you think that it is our duty to carry self-defense to a point of dictation into the affairs of another people? Do you think that the ambitions of America are not co-incident with the ambitions of the nation itself?

U. S. DEPOT AT SEATTLE BURNS

Bursting Shells and Projectiles Kill Children in \$500,000 Blaze

SEATTLE, July 1.—Pacific Coast Companies are located in and around the depot and containing a large number of shells, projectiles, powder and other ammunition, was destroyed by fire last night with a loss of \$500,000. The explosion of powder, explosions and discharge of shells and projectiles created a noise as if bombs were being bombarded the city. A number of shells were hurled into Western Avenue, an unlighted building, and killed by a fragment of shell. The shock of the explosion shattered windows in numerous business houses and waterfront buildings.

The United States cable ship Burnsides, which had arrived from Alaska yesterday afternoon, and was lying across the face of the government portion of the pier, was set on fire by a fire which was carried into her rigging. The flames were carried into her rigging and ablaze she put out into the bay. The fire was finally extinguished without injury to the vessel.

California Round-up at San Jose Opened

SAN JOSE, July 1.—With a parade through the downtown section, the four days of the California round-up opened here today. One of the largest crowds ever gathered in San Jose was on hand to cheer the hundreds of horsemen and horsewomen.

Predictions that this, the first annual round-up show held under the auspices of the California Round-Up Association, would be the best of the kind ever staged in the West, seem certain of fulfillment.

Mayor James Ralph Jr. of San Francisco, supported by James Ralph III, his 10-year-old son; J. Emmet Hayden, supervisor of San Francisco; Charles H. Sooy, Captain Henry Gleason, and Dr. Thomas W. Leland, headed the parade.

Like the cowboys and cowgirls who followed them, these San Francisco men were costumed in chaps and spurs. Even little James Ralph III wore his cowboy regalia.

Wild West programs are to be staged tomorrow, Monday and Tuesday in the park, and in conjunction with the final day, a Fourth of July celebration, at which Governor Hiram W. Johnson will be the principal speaker, will be staged.

THE MEDDLER

Seattle, and then to Minneapolis to live.

Miss Amsden was the lucky girl who caught the bride's bouquet, and at supper Mrs. Alan Field cut the ring in the bride's cake for a souvenir of her sister's wedding.

MISS PALMER'S LUNCHEON IS CHARMING AFFAIR.

URELY no bride of the season have been given in the roof garden of the Claremont Country Club, because it is the prettiest possible setting for a summer party, with its trellises and vines and the fountain set among palms. Also a perfect setting for bright sports costumes and garden hats. Apropos of which, Miss Alice Palmer, gave one of the most attractive parties of the summer there last Wednesday.

It was a small affair for less than a dozen friends were asked to meet Miss Gertrude Runyon of Sacramento. But, as it happened, the hostess and her guests, are an unusually pretty group of girls and all of them wore the soft striped silk sports costumes or the light-colored chiffons of the season that are so inevitably becoming.

Miss Palmer is quite the beauty of the younger set, and when she makes her debut she will be a polite sensation in society. Very like pictures of Julia Marlowe in her youth. Miss Runyon is fair and slender and tall and a charming contrast to Miss Palmer's brunette type. She wore a soft yellow and white striped silk sports suit and a yellow and white hat. Miss Palmer's gown was of some heavy silk in rose and white stripes with a rose and white hat. It was odd and stunning and had that "imported look" that has not been lost to some things even if France is at war.

Mrs. Potter was most attractive in her wedding gown of soft gray chiffon taffeta with rose-shaded Georgette and a becoming white hat with pink roses. There were no attendants and she was given away by her father.

Mr. and Mrs. Potter will spend their honeymoon in the North and later visit the former's home in Kansas. In the fall they will return to Oakland and plan to spend a part of every year in California.

Mrs. Ernest Wiltsee had explained it. She arrived in San Francisco from Paris this week and told of the beautiful gowns still built in the Rue de la Paix, but entirely for the American fashion market. French women are wearing the simplest possible things, but lovely creations are sent to the States.

Mrs. Potter has a collection of most beautiful gifts from old friends of the Gray family, that has been identified with Oakland society for many years, and from members of the Hell Club, of which she was "the youngest president."

• • •

HALL-BROWN WEDDING EVENT OF THE WEEK.

It is a pretty bridal custom of college girls, when they marry, to have a group of sorority sisters for ribbon-bearers at their weddings. Mrs. Sheldon Brown (Jessie Hall) followed it at her wedding Wednesday evening and four of her classmates at Stanford carried the long white gauze ribbons tied with clusters of lilies of the valley that formed an aisle for the bride. They were: Mrs. Edwin Sheldon of San Francisco, Miss Donna Amsden of Southern California, Miss Beth Baldwin and Miss Parsons.

Mrs. Alan Field, who was her sister's matron of honor, wore pale blue Georgette and carried a garden hat filled with pink sweet peas. Mrs. Sheldon and Miss Amsden wore rose color and Miss Baldwin and Miss Parsons were in blue, carrying out the color scheme.

The wedding at the Hall home in San Antonio avenue was quite a large affair and the decorations quite elaborate of pink sweet peas and roses that formed a canopy for the ceremony. The bride's gown was the favorite white and silver effect, with long veil caught with clusters of fragrant natural orange blossoms.

She was very lovely to look at, entering the room with her mother, Mrs. Jennison C. Hall, who gave her away. Mrs. Hall's costume was a handsome affair of black Georgette embroidered with iridescent blue heads over white taffeta, and she carried a bouquet of orchids.

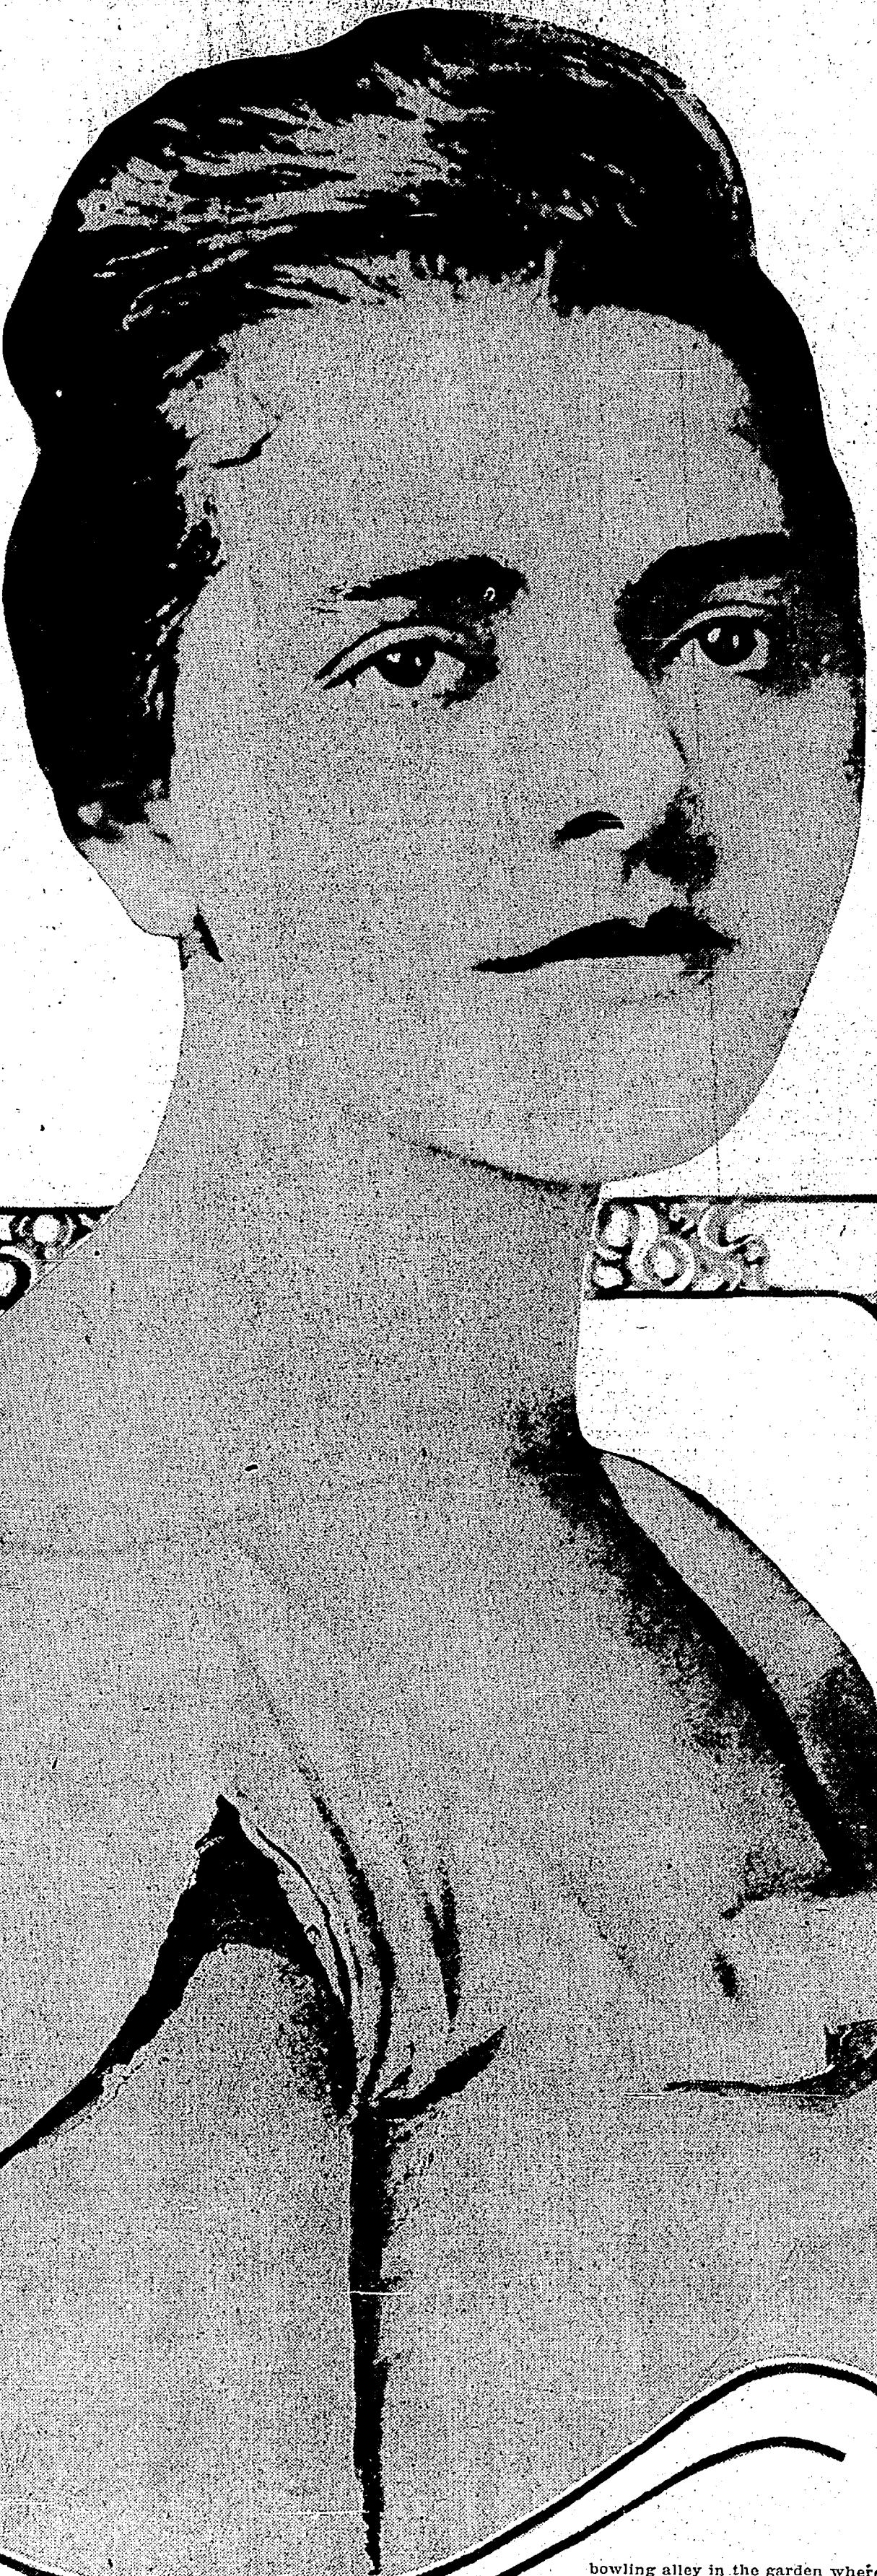

Mrs. F. V. Brown of Seattle, mother of the groom, was in light corn-colored taffeta.

After the ceremony there were congratulations and good wishes and then the wedding supper, for which a merry party was seated at the bride's table. It held a broad gilded basket of bridge afterward, and among the guests were Mrs. Jack Martin, Mrs. Dudley Dexter, Mrs. Fritz Hershaw, Miss Allen, Miss Alfreda Wright and Miss Doris Bornemann.

But, to return to Miss Palmer's luncheon, there were several games of bridge afterward, and among the guests were Mrs. Jack Martin, Mrs. Dudley Dexter, Mrs. Fritz Hershaw, Miss Allen, Miss Alfreda Wright and Miss Doris Bornemann.

AL FRESCO RECEPTION FOLLOWS WEDDING.

The Lansing-Kane wedding in Ala-

FRASER PHOTO.

MISS ALICE PALMER, ONE OF THE BELLES OF THE YOUNGER SET, WHO WAS A HOSTESS THIS WEEK. SHE IS THE DAUGHTER OF MR. AND MRS. WARREN S. PALMER.—Fraser photo.

meda last Wednesday afternoon was. The former residence, a big old decidedly picturesque in the living fashioned mansion, was burned. a room of the quaint home at "Fern- score of years ago, and the art troo side," the old Cohen place, where the ure, library and other things saved

bowling alley in the garden where the family found shelter. It proved so comfortable and attractive with its hardwood floors, paneled walls and high-beamed ceilings that, with a few additions, it was converted into a charming residence. It was in the oddly attractive living room of which at "Harbor Hill," the Benedict place, the long dining room is a wing, that on Long Island sound, and where they this week have sent Mr. and Mrs. Miss Mildred Lansing, grand-daughter of Mrs. E. G. Cohen, was married to Augustin Kean of San Francisco. The cisco just at present and spending the summer at the daughter of Mrs. Gerritt Liv-

ingston Lansing of San Francisco, who Wednesday they leave for a trip to the Mojave desert and will be accompanied by several friends. Piedmont will see them again next winter.

FAREWELL TEA FOR NAVY BRIDE-ELECT.

Tomorrow afternoon Mrs. Herbert Jenness and Miss Lulule Jenness will be "at home" informally at the Berkeley residence, and many of their friends will take the opportunity saying "bon voyage."

Mrs. Jenness and her daughter will next Thursday for Panama, where

Miss Jenness will be married to Lieutenant Robert Howe Thompson, U. S. N., who is now with his ship at Colon. The travelers will have a gay "send-off" at the steamer on Thursday. There are boxes of wedding gifts—many of them—to be installed in some picturesquely house at Colon. Miss Jenness is a cousin of Mrs. Robert Hayes of San Francisco, and of Mrs. Joseph Leroy Neilson, wife of Lieutenant Neilson of the navy, who indicated that her cousin is also minting "the service."

MR. KOHL IS JAZZER CLOG DANCER.

Mr. Fred Kohl, even though he would have been a far more lucrative career than music might be open to him, may not know it, could be a zeddy headliner, not as prima donna, but as a clog dancer.

Mrs. Oscar Fitzalan Long and her daughters, Miss Amy and Miss Sally Long, are having no end of a delightful time in the East. They have been the guests of friends at Annapolis and Governor's Island, New York, and at last accounts were at West Point, where the two attractive girls are great belles.

The summer at West Point is not a quiet season of vacation as it is at Yale or Harvard. On the contrary, the gayest time of the year, because the furloughs of West Point do not come with the annual regularity of college vacations. They happen only once in two years, so half the number of cadets at "The Point" are there through the summer, and there are hops and supper parties and much gayety for the summer visitors.

Mrs. Long and her daughters are to return to California over the Canadian Pacific and will visit Banff before coming south. Miss Amy Long was graduated this year from a finishing school in Washington and will make her debut next winter.

LIEUTENANT BUTTERS ON LEAVE IN LONDON.

Oakland society has been keenly interested in the military career of Lieutenant Harry Butters, who is fighting for England and who has sent vividly interesting accounts of the war to his California relatives.

This week his sister, Mrs. R. A. Bray, received a cable from him in London, where he is enjoying a leave, and no doubt being lionized, as officers on leave are these days. He is to spend only a week in London and then return to the front in Flanders.

Harry Butters is a second lieutenant in the Royal Field Artillery and has been decorated for bravery. He is tremendously enthusiastic about his work and about being in "the heart of things," and there are very stunning pictures of him in his British uniform.

TAYLORS TO VISIT SKYSCRAPER CHALET.

When Mr. and Mrs. William Hinckley Taylor visit New York this year they will doubtless be entertained by the former's cousins, Mr. and Mrs. Thomas Hastings, at their strange

"Swiss chalet" built on the roof of a skyscraper in Fifth avenue. They are twenty-one stories above the rush of home for many months, but had the avenue, looking down on the taken a keen interest in the social Grand Central depot and the myriad gaieties of her friends and in affairs

of the Fabiola hospital, which she founded and where finally her death occurred.

The other daughters are Mrs. Robert (Elta) Chabot, who lives in New York, and their home is in La Gatos, but is now a guest at Westbury, Long Island. The chalet is the family home; Mrs. Henry Bothin on the roof of the Vanderbilt Concourse building was built for their Dickman Jr. (Josephine Chabot); visits to town and is a perfectly who lives in Chetwood street; near equipped little residence of one story the Chabot house. They were born in and half a dozen rooms. It is such a residence at Tenth and Madison streets, where Mrs. Chabot health, the family has remained in health, the family has remained in the summer the family has occupied "Villa Elm," the country place near St. Helena, until this year, when, owing to Mrs. Chabot's ill

death of Mrs. Kate Fitzgerald this week has sent Mr. and Mrs. Fitzgerald into mourning. Mrs. Fitzgerald and Mrs. Alexander Marx, who was Mar-

THE MEDDLER.

SOCIETY News and Notes of Activities of the CONFESSIONS OF ROXANE

FRANCES WALTER.

Having confessed their love a month after their marriage, Roxane and Arthur have settled down expecting to be just husband and wife. But fate comes along with a pretty girl and what was tranquillity may become strife. Myrtle Staley, if the suggestion in this chapter is fulfilled, will be an important factor in Roxane's grief or happiness.

MIXED EMOTIONS

(Copyright, 1916, by the McClure News paper Syndicate.)

It begins now to record the incidents of their new life. I was truly born again that day when Arthur made the avowal of his wife and swain's constancy. The Tanners, or at least, the Tanner, made a vague memory of being received by Arthur in the sense he had given them before that day. I had however, from time to time, from the neighbors, that the Tanners were not getting on well. That Mr. Tanner had begun to drink and that Mrs. Tanner was becoming more and more extravagant. Arthur would tell me of his assistant's mistakes.

"I hate to speak to him about them," he said. "I know what the trouble is. That woman is a veritable vixen, and she makes him very miserable. If he has the sense of a jelly fish he would put it to me." As for Arthur, he was very thoughtful and anticipated my every wish. Heark not in so great a hurry to go to work that he would not come home in the afternoon as soon as he had finished. For a time, there was absolute happiness, and I reveled in it. In the meantime, a new turn for the household of our neighbors, we have a party in our little home. I have come to think of Arthur, because he only was there, but I feel due him that I cultivate some of the better people. I engaged a caterer, a magnificient dinner was prepared, and we began to come. There were to be only ten, and we felt that we had just enough room to make such a party comfortable. I did not, however, take into account, up to the time of the coming of their daughter and their son, Tom, college—they were twins—they had come to a joint party in our home. All the time we had been to dinner at their home on the night their children returned, I invited them, half meeting them at the entrance, half greeting them as they came in, and we arranged to receive

"I put my arm around him and kissed him."

I could not possibly do without some of my husband while I sat at the side of him," I said. "I knew I could make the evening interesting for him because I like to see him happy. I have a great deal to tell him about the world of college reminiscences and my life in the city which were shocking to her husband and mother. As soon as Arthur produced he assumed a paternal air and was very much in it. He was attractive. He was quiet and given to music and he played the piano divinely. It was his turn to play and we concert and his father had played the piano for him and did everything to encourage his leaning to music. Before the dinner was over he came to my side and stayed the hour on the piano. On the night of our party, Myrtle, who had been placed next to Arthur, said she wanted to tease him. I thought the party and make the evening more congenial for every one, but I could not protest when Myrtle made her

Hibernian Rifles to Gather for Games

Preparations have been completed for the field day and military tournament of Company B of the Hibernian Rifles in Glen Park tomorrow. All the military organizations of Irishmen in California will compete in the spectacular soldier stunts and many spirited clashes are expected to result.

Company B is reputed to be the best-drilled company of Irish soldiers in the United States, and is prepared to uphold its reputation on Sunday.

Besides the military maneuvers a fine program of athletics, old-fashioned Irish sports and Gaelic entertainment has been arranged. The queen of Irish "soldierettes," including Gussie Ross, Orlena Draper, Florence Souza and Milward Deas, is assisting the following committee: Thomas J. McCormick, John J. Cummings, P. B. Mahoney, Patrick Farley, Patrick Kelly, Harry Murry, Edward Twohig and Cornelius Finnegan.

Postoffice Savings Bank Shows Increase

Twenty new accounts, amounting to more than \$7000, and balances totaling \$5000 in fifteen old accounts have been reported by the post office savings bank branch in the post office since the order has been issued by the post office. The amount possible to be deposited from \$100 to \$1000 in a calendar month. This means an increase of approximately \$12,000 in deposits in the past thirty days.

John Brown's Sister Summoned for Trial

SAN JOSE, July 1.—Miss Sarah, daughter of John Brown of Perry, died yesterday at the home of her relatives, Mrs. John Brown, in Campbell. Miss Brown had been ill for a number of days, and was unable to leave the house. She was preceded by several days of bad weather. Snow is reported to have fallen in the mountains.

Cold Rainstorm Is Reported in Sacramento

SACRAMENTO, July 1.—The counties of Northern California visited with a cold rainstorm, according to reports. According to reports, it was preceded by several days of bad weather. Snow is reported to have fallen in the mountains.

WOMEN, *Unolo Whisk* Cares up for KIDDIES.

GARIS' BEDTIME STORY.

By HOWARD CALDWELL

"Well, there," cried Nurse Jane Fussy Whizzy, the muskrat "lady" housekeeper, as she stood in the middle of the kitchen floor of the hollow stump farmhouse and looked at a pot boiling on the stove. "I might have known it! I'm not a mother, but I'm a good cook, and I'm not afraid to tell you that you're not a good cook either," Uncle Wiggily Longear, the rabbit gentleman, said. " Didn't you have a fire in the stove before you began to cook?"

"Oh, I did that, part all right," said she. "But I forgot to get any carrots for the soup."

"Carrots, soup?" cried Uncle Wiggily. "Say, no more! You shall have all the carrots you want. Don't you know that I raise carrots on my farm, as well as onions, potatoes and cabbage?"

"You see, you have only been a farmer such a short time that I am not yet used to thinking of you as such, and I'm not a mother," said Alice, the telephone girl, when she wanted to get your number."

"I'll go over to my carrot patch, where the carrots are growing like wild onions, and pull you up some of those nice, long, yellow vegetables."

"Thank you," answered Nurse Jane, "and when you're finished, I'll give you some pie, like the pie I made yesterday."

"Oh, joy!" cried the bunny gentleman, popping up and down in happiness.

He clapped his hands and hopped about that day. "If there is one thing I like more than another, it is a carrot pie."

So Uncle Wiggily started off across his farm, which was a new one, and when he was gone, Mrs. Whimblewibble, the duck lady, came to ask Nurse Jane if she would not run over to the pen a moment to see about a new nest for Alice, the duck girl.

"Of course I'll come," said Nurse Jane. "I'll write telling him to leave the carrots on the table for him."

So over to the duck pen went Nurse Jane, with Mrs. Whimblewibble, and when she got there, she took a look at her hen with the sharp-pointed, yellow carrots she saw the note that the muskrat lady had left on the table for him.

"I'll go and get the carrots for him," she said, and when she got back, she was a surprise," said Nurse Jane, "You shall have all the carrots you want. You shall have all the carrots for him."

"So Uncle Wiggily started off across his farm, which was a new one, and when he was gone, Mrs. Whimblewibble, the duck lady, came to ask Nurse Jane if she would not run over to the pen a moment to see about a new nest for Alice, the duck girl.

THE FIRST REQUIREMENT.

President Wilson made an enunciation of national policy in his speech in Philadelphia Thursday that cannot be accepted by the people of the United States. Presumably having reference to the Mexican situation, he said:

I believe that America, the country that we put first in our thoughts, should be ready in every point of policy and of action to vindicate at whatever cost the principles of liberty, of justice and of humanity, to which we have been devoted from the first. You cheer the sentiment, but do you realize what it means? It means that you have only got to be just to other nations. It comes high. It is not an easy thing to do. It is easy to think first of the material interest of America, but it is not easy to think first of what America, if she loves justice, ought to do in the field of international affairs.

As an afterthought Mr. Wilson said that America has a right to demand that other nations treat her in this fashion, but that she cannot with dignity and self-respect insist upon that unless she is willing to act in the same fashion toward them. And for this just treatment toward other nations he is ready to fight at any cost to himself.

These remarks call to mind at once that man who habitually beat his wife, but joined with high enthusiasm the society for the prevention of cruelty to animals.

The statement that to vindicate the principles of liberty, of justice and of humanity means that we have only got to be just to other nations is ridiculously insufficient. Vindication of these principles means that, first of all things, we must not only demand, but exact from other nations justice for our own nation and its citizens. This is the greatest, the most forceful, international lesson in liberty, justice and humanity we can give to the other nations of the earth. To give this lesson was one of the objects of the founders of the American republic and the steadfast ideal of all highminded statesmen who have participated in the government of the republic.

If we do not demand and exact justice for our own country first, practice justice toward our own people, we become a nation of poseurs and hypocrites when we begin to preach justice among other nations, and one nation toward another.

Unfortunately other nations have so regarded us during the last three years. Our practice of overlooking the requirements of humanity at home, in our own territories, when its rights were being wantonly violated by the unlawful elements of a neighboring republic, has evoked derision and created doubt as to our good intentions. Our word has come to be accepted at less than its face value. We have been accused of insincerity.

A nation cannot with good grace undertake to preach national virtues abroad when it fails to keep its own house in order. This is the lamentable condition to which Mr. Wilson's vaunting idealism has brought us. His administration has ignored the demands of American citizens along the border of and in Mexico for justice and protection in their legitimate pursuit of liberty and the right to live in peace.

No nation will believe that he means what he says about ideal justice between nations so long as he suffers unrebuked, continued and unprovoked injustice to American citizens. The people do not endorse such a policy and they fervently hope they will not have to suffer under it much longer.

IS IT POLITICS?

Gifford Pinchot, meddler by occupation, whose haphazard probably will never be uttered so long as he retains the faculty of speech, has again turned his attention to California. He has gone to Washington with the expressed purpose to help kill the oil land provisions of the so-called Phelan bill, now on the calendar in the Senate. Without attention to the merits of the proposed relief measure, it is sufficiently offensive that Pinchot should oppose any project which is approved by all the citizens of this State who are acquainted with it and is opposed by no one, and which does not affect the interests of any other State.

It appears from his statement that Pinchot is to assist members of Mr. Wilson's cabinet who are opposed to the oil land relief bill. Secretary of the Navy Daniels and Attorney General Gregory, we are reminded, are against this bill. This is not news. The Attorney-General's arbi-

trary interpretation of the Taft withdrawal order is the thing that has made the relief now sought necessary if the independent oil industry of the State is to escape disaster. Secretary Daniels has been open and above board in his antagonism. Pinchot's assertion that Secretary of the Interior Lane favors the bill should be qualified by the explanation that he is not outspoken in his support. Mr. Lane has failed to come out openly for the measure and the explanation given is that he does not wish to arouse the animosity of the Departments of Justice and the Navy by going contrary to their views. The oil operators have relied mainly upon the reputed strong influence Senator Phelan has with President Wilson to induce favorable action on the relief measure.

Not a little uneasiness will be felt over the effect of Pinchot's appearance on the side of the opposition. The wealthy leader of the late Progressive party may be able to convince Mr. Wilson that he is in a position to throw him some political support in the coming election, in which case the support Pinchot alleges he controls would necessarily be placed in the balance against that of Mr. Lane and Senator Phelan, as well as against the material interests of the people of California.

NEW OCCUPATIONS FOR WOMEN.

That the college woman is finding the field and variety of salary-earning occupations rapidly increasing has become apparent in the last few years. Considering that the first graduate of an American coeducational institution is still living in New York a survey of the present situation regarding opportunities for college women is very gratifying. Formerly it was considered that the work of women with university degrees should be teaching, almost exclusively. Today there are scores of non-teaching vocations where the demand is greatly in excess of the supply.

In a bulletin just issued by the Intercollegiate Bureau of Occupations from its headquarters in New York, special attention is given to employment outside the more familiar fields of professional work. The field of home economics is accorded a conspicuous place. This is divided under the headings of dietitians, extension work in rural communities, matrons and house mothers, restaurant, tea rooms and cafeteria managers, and superintendents and housekeepers of clubs, hotels and schools.

"Dietetics is coming to be recognized as a highly specialized profession," we are informed. "Calls for dietitians come from hospitals, clubs and progressive institutions, public and private. This fact probably explains the relative scarcity of good dietitians. A woman who supplements her academic knowledge with thorough training in dietetics in one of the well-standardized home economics training schools will find herself in demand."

Extension work in rural communities is increasing rapidly, says the bureau, especially under the influence of the Smith-Lever bill, which provides federal aid for instruction in agriculture in country districts. Women who have the foundation training in the science of food and in addition a strong teaching instinct will find in these openings a field apart from the traditional classroom work. Matrons and housemothers are considered in the social work group, although the positions are less highly specialized and the scientific training and attitude, while important, must be combined with a general social spirit.

Restaurants, tea rooms and cafeterias are recommended as good opportunities for college-trained women with small capital to go in business for themselves. Good executive ability, a thorough knowledge of food and a business sense are essential to success. Housekeeping for hotels, clubs and schools offer opportunities for the application of the college woman's special knowledge in a practical way. The duties of these positions require catering to large numbers, scientific buying and the management of a staff of servants.

In this one class of work, the bureau has pointed out the many uses for which special training of college women especially equip them. Further than that, we are reminded that the college woman already has made her presence felt in the various occupations, and that the demand for her services is increasing. If there were no other grounds on which to justify the higher education of women this would be sufficient—that she is bringing greater efficiency into the most neglected phase of our national life, home and social economics.

No surprise was occasioned throughout the world of socialism by the conviction and sentence to thirty months penal servitude of Dr. Carl Liebknecht for participation in an anti-government demonstration in Berlin. His offense was one that cannot be tolerated by a government under military law. He had marched with his fellow Socialists through the streets of the German capital and cried against the government and the Kaiser. Dr. Liebknecht is a lawyer and member of the Prussian Diet and the Reichstag, hence was fully informed of the gravity of his offense. His punishment is not a peculiar manifestation of the Germany militaristic system, as many will choose to consider it, but what might reasonably be expected under any government facing such tasks as Germany is involved in at present; though not all governments would act with the admirable sureness as did Germany. All governments will in time be forced to the necessity of dealing summarily with anti-government agitators when the nation is in great peril.

It appears from his statement that Pinchot is to assist members of Mr. Wilson's cabinet who are opposed to the oil land relief bill. Secretary of the Navy Daniels and Attorney General Gregory, we are reminded, are against this bill. This is not news. The Attorney-General's arbi-

Editor's Column

NOTES AND COMMENT

Julius Kahn has filed nominating papers. That is all there ever is to the Congressional race for Julius Kahn further to it.

"Wilson is in fighting mood," tips off a headline. Which is some different from the hypothetical nation he once alluded to as being too proud to fight.

"Potash is now worth \$100 a ton, which will spur up the kelp industry until the Santa Barbara channel is likely to look like a wheat field full of reaping machines."

The Home Industry League is indifferently enamored of the 700,000 Club, and its name implies as much. The Home Industry League believes in achieving progress by broad-gauge effort.

Here is a new idea—one milkman seeking a court's interposition to prevent other milkmen cutting prices. It happens in Berkeley, and how it comes out ought to be a matter of interest in other than lacteal circles.

With regard to the news that two mighty luminaries of the law in San Francisco have accused each other of being "pirates," "frauds" and of committing perjury, let us trust that both of them are inexact in the amenities.

A Mendocino woman seeks a divorce because her husband wants her to ride on a plow. We do not remember coming upon this as one of the statutory grounds, but it should be. It really doesn't appear to be a wifely duty to ride on a plow.

Somebody in the state of New York wants to get up a celebration of the birth of baseball. He says the initial year was 1839. There can not be many of the original nine left, but there are occasional games that cause us to wonder if some of them are not surviving.

The Hessians surrendered at Trenton a long time ago and now the action seems to be duplicated by the sinners. General Billy Sunday led the hosts that vanquished the enemy, and besides the souls garnered, received a "free will offering" of \$32,344.41.

Rain is held by the city attorney of San Francisco to be an act of God, and, therefore, that city employees whose jobs lay out-of-doors, but who couldn't work on account of rain, much as they chafed at idleness, are entitled to their pay just the same—a decision of Solomon's character.

The story of tracing a woman burglar by a scented handkerchief is just like the old-fashioned play, but it serves to illustrate the feminine idiosyncrasy. The burgling-industry is most safely carried on like the plumbing industry—without dainty accessories, however esthetic the operator may be.

Now we are informed that those who deal with such statistics have figured that you have a better chance at 45 to live ten years more than at 25. Death is a hard game to, dole. Like horse-race, you may figure what ought to occur, but so many unexpected things may happen that the only certainty is the ultimate.

Some cities have crossed out the word "sane" from their celebration programs of the Fourth, plenty of news is expected to find promulgation on the fifth. Young America is likely to believe he has a friend in the official who takes off the fire-works lid, but older America always looks to stand by the consequences, and looks forward dubiously.

If you were in Germany you would have to obtain a government card of authority before you could buy any meat. Those who mount boxes and cart tails at street corners to rail at the restrictions the law places upon human liberty in this country ought to be compelled to try it in Germany awhile. Their appreciation might then be whetted by their experience.

The chances are that we will not all give way to complete surprise upon reading that Rev. Charles F. Akad, though he went personally to Berlin, failed to obtain the Kaiser's peace terms. But we are impressed by the incidental assurance that Rev. Mr. Akad is a member of the permanent Peace Conference, located at Stockholm. He had been lately overlooked in the other distractions.

SPIRIT OF THE STATE PRESS

The suicide of the Bull Moose at Chicago was probably forced by the appearance in the field of the Bull Mole party, sponsored by Mr. A. Mutt—Redding Searchlight.

The writ of habeas corpus sued out by Mrs. Deasy for the release of her son, Pierce Deasy, from Company D, was partially heard by Judge Edgar Zook yesterday. The young man was anxious to go with the company, but his mother insisted that he was not of age—San Rafael Independent.

The Colusa Sun looks at it in this way: "The announcement of Governor Johnson regarding the turn-over to Judge Hughes seems only this year's transaction. He says in effect that much. His idea seems to be to knock out the Democratic party nationally this year, and thereafter to reverse the old relations of the Bull Moose."

Republicans are greatly elated over the attempts of the Democrats to "get something" on Judge Hughes. Their campaign up to date has been characterized thus far by attacks on his whiskers and his judicial position. It is little wonder that the President has frowned on these methods—Merced Star.

Republicans are greatly elated over the attempts of the Democrats to "get something" on Judge Hughes. Their campaign up to date has been characterized thus far by attacks on his whiskers and his judicial position. It is little wonder that the President has frowned on these methods—Merced Star.

Mexicans in California who behave themselves and keep the peace have nothing to fear, whatever turn events may take below the border. There is none of the spirit of savagery in our people. We shall have no fury to vent against inoffensive Mexicans who have no part in the anti-American hostilities below the border—Grass Valley Union.

It appears from his statement that Pinchot is to assist members of Mr. Wilson's cabinet who are opposed to the oil land relief bill. Secretary of the Navy Daniels and Attorney General Gregory, we are reminded, are against this bill. This is not news. The Attorney-General's arbi-

CARRANZA'S ANSWER

THE COMING OF THE SLAV

Dr. Charles Mayo, the president-elect of the American Medical Association, thinks that the Slavs are to be the dominant race of the future. He will find many Russians, and doubtless not a few Austrians at the present time, who will agree with him. Dr. Mayo expects the Russians to surpass the Americans, and his reason for predicting that our nation will take second place is our alleged commercialism, while the great surgeon says, leads the American people to sacrifice health and racial development to the idols of commercial success. While most of us are less pessimistic about the future of our country than Dr. Mayo is, we find nothing new in this indictment of America. Most people who think have long been aware of the evils wrought by our national commercial spirit.

Russia does not at present threaten to surpass the United States, but we are all just waking up to the fact that the Slav is large on the Eastern horizon. Russian statesmen assure us that their nation has no ambition for westward expansion beyond an outlet to the Mediterranean. Whether or not this is true, we may be sure that Russia will have a greater influence upon western civilization than ever before. The rise of the Slav is already having its intellectual effect upon us. It is probable that Russia will make herself felt in the things of the mind fully as much as in things political.

Even before the war the Russian spirit had begun to make its mark upon the thought of England, France and America. Nothing shows this fact so clearly as the influence of Slavic literature upon these western peoples. The greatest writers of fiction in the nineteenth century—Tolstoy and Dostoevsky—were Russians. The greatest living novelists of England and France—Conrad, Galsworthy and Rolland—show strong Russian influence. The two great Russians, together with Turgeniev, Andreyev, Gorky and Gogol, have modified the literature of every western nation. The realism, the psychological analysis, the brooding philosophical insight of these Slavic writers have put an end to the easy optimism and conventional thinking of the Victorian era.

Even Germany has been unable to resist the inroads of the Slavic mind. It is interesting to note that Nietzsche, the writer whom Anglo-Saxons most blame for Prussian militarist atrocity, though he was a German subject and wrote in the German language, was Slavic, both by ancestral descent and intellectual temperament. Descended from an ancient Polish family, influenced, as he says, by Dostoevsky, from whom he confesses he derived the idea of the superman, Nietzsche, as all know who have read his works carefully, was ever more Slav than Teuton.

Possibly it is this spiritual influence of Russia which Dr. Mayo has in mind when he contrasts the Russian temperament with our American commercialism. It is certainly this, even more than the present campaign in Austria, which indicates that in the future the Slav will be taken into account—New York Tribune.

Even before the war naval air service had begun to be developed. The naval committee of the House, \$3,500,000, is probably large enough for the first year, but the navy will practically be compelled to begin at the very beginning in the establishment of an aerial service.

The West Oakland Improvement Club held an important and well attended session at Hansen's Hall, corner of Goss and Wood streets, last night. The committee selected some weeks ago to obtain subscriptions to defray a portion of the expenses at the foot of Twelfth street and the head of Pine street, reported that the necessary amount had been secured.

Mr. and Mrs. H. B. Pinney have left for a camping trip in Yosemite.

Mrs. Cassell and Miss Bessie Cassell have returned from a month's trip to Europe.

Mrs. J. M. Kimball and daughter, Miss Gertrude Kimball, are stopping at Pacific Grove for the summer.

EVIDENCE THAT IS OVERDUE

A tablet has been erected by the Bankers' Association of South Carolina in the court-house on the steps of which a sheriff, his deputy and a prisoner were shot to death by a mob. The tablet is a tribute to the inscription states, to officials who "dare discharge their duty in the face of danger, even at the risk of their lives." The incident is further evidence of the awakening of Southern sentiment against lynching. The prompt arrest and conviction of a few lynchers would be still stronger evidence, which is overdue—Springfield Republican.

Troubles are everywhere, rising and striking,

HARF TOLL
DEMANDS OF
CITY IGNOREDMunicipality Unable to
Collect Rates for
Harbor Use.

Demands made some weeks ago by Wharfingers, W. J. Masterson and corporations with wharves over which they are doing business along the Oakland harbor, gave the city until today to comply with the provisions of the Moro Harbor ordinance by paying tolls and docking fees into the city treasury. The corporations have, for the most part, ignored the demands and the city has not proceeded to enforce collection of the revenues due under the new law.

City Attorney Mort, stated today that he would not advise starting an

proceeding against the delinquent

concerns until after July 4. He would

not disclose just what action he will

advise the council or the harbor de-

partment to take to make the initial

use of the validity of the new harbor

ordinance.

CREATES HARBOR FUND.

The council yesterday adopted a

resolution creating the harbor fund

for the new fiscal year. All water

revenues will be paid into the

fund will be kept segregated

by the city treasurer. The money in

the fund will be used for harbor

development and cannot be dispensed

with anything but harbor betterment

and maintenance.

The harbor ordinance, for

some months ago, created

a harbor for Oakland, described

as a harbor which the city

should exercise full

power over all wharves, docks,

levees, and other water-

structures within these boundaries.

An essential provision of the ordi-

nance gave the city the right to

charge for dockage, wharfage and tolls

on all business transacted over

wharves and docks, whether pub-

lically or privately owned. In return

the municipality agreed to maintain

the harbor in good condition and to

pend a portion of the revenues

derived, not only before the el-

evation of wharves and docks, but before the

privately owned as well.

NOTICE ISSUED.

Soon after the ordinance was

passed, City Wharfinger W. J. Mast-

erson sent notices to the Southern

Company, demanding payment

of the wharfage and tolls on all

concerns engaged in wharfage and

dockage business along the water-

front. No reply has been made

to the demands and it is probable

the city's right to collect these re-

venues will have to be tested in

court.

The right to prescribe the pol-

icy of vessels shall land; to estab-

lish form rates for dockage and whar-

fage; over all wharves and to col-

lect revenues has been recog-

nized by the Supreme Court, according

to City Attorney Mort.

W. P. Feeder Line
Plan Incorporated

Articles of incorporation for one of the first new "feeder" lines to the West Pacific system have been filed with County Clerk, Alameda, the company known as the Indian Valley Railroad Company, Inc., of Alameda, Calif. The incorporators are F. Klamp, Paxton, J. F. Humbert, J. J. Trunia, William Engels. The company has formed for the construction of two six miles of road from Keddele of Western Pacific into Plumas County. The Ocean Transport Company, with a capitalization of \$250,000, has also a 50 per cent interest. The incor-

porators are R. H. Swayne, Al-

lbert I. Fagan, San Francisco; John

Schiff, Menlo Park; E. B. DeGolli-

land, and John F. Craig of Long Beach.

The purposes of the corporation

building and operation of vessels.

NAVY ROMANCE ENDS
IN HURRIED WEDDING

MRS. JAMES TAYLOR (MARI WHITING), WHOSE WEDDING TO PAY TO THE YOUNG NAVY OFFICER FOLLOWED A ROMANTIC NEAR-ELOPEMENT IN BERKELEY.

Whiting-Taylor Ceremony Takes Place in
Santa Cruz Mountain Home

A surprise of the day is Miss Marie Little Jean Allen Macrae, was flower girl Whiting's suddenly planned marriage to Lieutenant James Harvey Taylor, U. S. N., which took place at noon at the summer home of Admiral and Mrs. W. H. Whiting in the Santa Cruz mountains. It had been arranged for September, but the trouble with Macrae may result in the marriage taking place in October. The bride was a young woman of exalted pedigree, over white taffeta and a green hat of lace. Her flowers were purple orchids and gardenias. Her god-daughter,

a limited number of guests had been invited. Rev. Hopkins of Berkeley, where the Whittings have resided since Admiral Whiting's retirement from the service, was present to officiate. The bride was a young woman of exalted pedigree, over white taffeta and a green hat of lace. Her flowers were purple orchids and gardenias. Her god-daughter,

Ross Will Not Run
in Commissioner Race

Thomas Ross, who in his recall election platform announced that he favored "a wide open town," maintained that he was allied with no women's organization and "admitted" that he was the best qualified man for the position of Commissioner of Public Health and Safety, has withdrawn from the race. As Monday is the last day for withdrawals, this leaves six candidates still in the political ring.

Ross, in his announcement to the voters of Oakland said, in part: "After canvassing the City of Oakland thoroughly, I find that with the exception of a few agitators who induced me to enter this race in the first place, the sentiment of the people is overwhelmingly against the recall election.

TRIBUNE'S DOUBLE PAGE OF SPORTS

TENNIS
BILLIARDS
GOLF GOSSIP"SKEETER" UNSTEADY BUT
BACKING SAVES HIM GAME
Seals Raise 1915 Pennant and Win Ball
Game Both in Same Day

Skeeter Fanning was lucky to win the game across the bay from the Oaks yesterday, but Sammy Beer would have been just as lucky had he been on the long end of the tally. The score was 2 to 1 in favor of the Seals, but there might have just as well been twice as many scores on either side. The San Francisco team is to be congratulated on winning the game, for it was one of those rare occasions when a baseball club puts off its celebrated Western Coast League pennant, won last year by Harry Woerlton and his team, by our valiant Seals, who, before the contest, by our valiant Seals, who, before the contest, were first to score in what promised to be a very tight contest. Up to the fourth inning when the locals put over their first tally, one hit had been allowed by each pitcher, and the game was all over large. With two men retired, Gardner walked, advanced on Barry's single, and came home on Elliott's smash to center.

The Seals were not long, however, in putting up on their end of the scales. In the second half of the same inning, Jack Dalton surprised the fans by rappelling on to the fence and making second on it. Bodie followed with a single, and ten good hits were put over the line, the last through him, and Dalton scored. Bodie reached third on the hit. Rowdy Elliott did not like Ping's presence on the last corner, and tried to quick return, getting a hit, but the ball was all right, although not quick enough to get Eddie, and Bobby Davis let the ball go right through his hands, the San Francisco fence buster ramming home with what proved to be a winning run. And that proved to be a winning run, with them on. Skeeter Fanning's unsteadiness, coupled with several lucky clouts, two of which came in one inning, gave the Oaks a winning score, but something always happened.

What looked like a score in the sixth inning was prevented by Ping Bodie's arm. With Kennedy on first, Bodie hit one to center. Bodie made a perfect throw, and nabbed Kennedy at the plate. The score:

Pinch Hitter Griggs Sends in
Winning Tally in Ninth
Inning.

LOS ANGELES, July 1.—Vernon won both games of a double header from Salt Lake yesterday. The scores were 1-0 in the first game, and 3-2 in the second.

A ninth inning rally gave Vernon the victory in the second game. With the score 2 to 1 against the Tigers, two out, and Rader on first, the Tigers were looking for a base hit, but for Mitchell, who had been holding for Rader, doubled, scoring Rader. Doane's single off Flitter, who replaced Hughes, scored the winning run. Ryan was injured sliding to second in the fourth inning of the second game, and was out for the remainder of the game.

Fronime triumphed over Klawitter in a pitchers' battle in the first game, Vernon winning 1 to 0. A double play, Matlick to Rader, in the ninth inning, and a double play, of two outs, for the bases had been filled with none out. Vernon's run was made in the eighth inning on Rader's triple and Doane's sacrifice fly.

The scores:

OAKLAND A.B.R.H.P. SAN FRANCISCO A.B.R.H.P.

FURTHER DEPRECIATION IN WALL-STREET PRICES

Industrial Alcohol Declines 4% Points; Munitions Also Low.

NEW YORK, July 1.—Prices underwent further depreciation today on an insignificant turn over. Pressure was directed against various spirituous liquors. Industrial Alcohol, which registered an extreme decline of 4% points, with two to four points reductions from the more active munitions and equipments. Mexican and motors, two to five at their lowest end, and marines, as well as metal issues, shaded a point or more. Rum, alone were firm. Canadian Pacific rose almost two points, with substantial advances in Wabash preferred issues. The closing was heavy. Bonds were lower.

Dealers were on a limited scale, due mainly to the small attendance of traders. Texas Company and Canadian Pacific were distinctly firm. Later specialties began to sag with especial heaviness in Baldwin Locomotive, Steel, Studebaker, Mexican Petroleum and American Smelting United States Steel yielded a small fraction with 1% for Bethlehem.

—**STOCKS AND COMMODITIES**

Financial news—Market is expected to be irregular again with professional pressure on industrials, on weak spots, and quiet buying of high grade railroads. The market is becoming increasingly uncertain to the July re-investment. The holiday atmosphere suggests a narrow trading and evening up market. American woolen and sou' by preferred are reported well taken.

Utah and Inspiration are exhibiting signs of persistent accumulation. Predictions are made that further sensational dividends are expected. The automobile group but that at such times it will be well to carefully discriminate.

J. S. Burke—Under the influence of
